Pro-Line Linear is modular light line system composed of support profiles, plug & play light modules and various accessories. A lighting solution for manufacturing, warehouse, retail and office spaces, unmatched in both uniformity and lighting efficiency, which is also quick and easy to install. The LED modules are available as switchable or DALI versions, optionally equipped with an emergency unit. Thanks to the large selection of light distributions and incrementally adjustable brightness levels, these luminaires are suitable for virtually all mounting heights and lighting tasks. Pro-Line Linear is flexible and scalable in planning and design, economical to purchase, and saves energy and maintenance costs, instantly and ongoing during a long service life. Pro-Line Linear from Prolumia: a versatile lighting solution that transforms a space into a dynamic and sustainable environment.
