COMPACT FLOODLIGHTS WITH OPTIONAL REMOTE-CONTROLLED PIR SENSOR

The Prolumia Pro-Flood Basic series consists of three compact floodlights which can be used for both indoor and outdoor applications. Available with or without PIR sensor. The PIR sensor is easy to operate with the supplied remote control, which can be used to set the daylight threshold and the hold time. Due to the high efficiency of up to 110 Lm/W, the fixtures can be perfectly used to illuminate facades and advertising signs, for example.
